Unit 5: The Internet

Dialogue

Vanessa: The recent research shows that the usage of the Internet is increasing. It says that the aim of the Internet connection varies from person to person. The least usage is listening to the music with 63%. So, what do you use the Internet for?

Nathan: Hmmm. I often use the Internet for social networking sites I have account in different sites. I share photos and songs, comment on posts, check notifications, confirm friend requests and reply messages. What about you?

Vanessa: I am a subscriber of some science and technology blogs. I generally log in and read articles in these blogs. I download some e-books and upload some videos on them. I sometimes send e-mails with attachment to my friends.

Reading

Everyone uses the Internet moderately in my family. I don't think that there is an Internet addict in our house. The Internet is functional for each of us. For example, I check notifications and surf social networking sites. I play games with my friends. However, my favourite activity on the Internet is studying English and Spanish. My father, Salih, generally uses the Internet to check his e-mails. He sometimes reads online news. Besides, he is fond of online shopping to buy equipment for fishing. My mother, Zeliha, usually uses the Internet for checking bank accounts. Also, she looks for new recipes and health cures. Finally, my elder brother, Buğra, is a high school student. He always browses articles about his lessons. In his free time, he often likes following foreign series to improve his English.
