Meanings

air pollution: People can't breathe easily because of the vehicles' exhaust fume.
global warming: The temperature of the Earth surface increases.
deforestation: People cut down large numbers of trees in the forests.
nuclear waste: These are the poisonous chemicals. People use them in agriculture.
water pollution: People throw rubbish into the lakes, rivers or seas.
pesticides: It has bad effects on life and causes genetic problems for humans and animals.

Dialogue

Taylor: Bella! Why do you look so worried?
Bella: Did you read the newspaper?
Taylor: No, I didn't. What happened?
Bella: The temperature is rising and the ice in the poles is melting.
Taylor: Really? Why?
Bella: Global warming!!!
Taylor: What's behind all this?
Bella: Of course, us, humans. We're always disturbing the balance of nature.
Taylor: How? What must we do to stop global warming?
Bella: First, we must use public transportation to prevent air pollution and the increase in temperature. Then, we have to reduce water and energy waste.
Taylor: What else?
Bella: We mustn't cut down the trees because they are necessary for the oxygen. We mustn't use sprays and pesticides on farms.
Taylor: We shouldn't forget that we are responsible for the nature. We have to take actions and do our best.
