Alex: Do you think what will be the most threatening problem of the World in the future?

Hülya: I think deforestation will be the biggest problem in the future. Because if there are no trees, we may have many bad problems such as landslide and air pollution.

Alex: You are right, but I think world will be facing with water shortage in the future. This will be the most dangerous problem.

Hülya: Why do you think so?

Alex: Because everything in the world needs water. Without water, even trees cannot survive. So, we have to take some precautions right now to prevent water shortage.

Hülya: Well, I guess both are important for our future. We must do what we need to do to save our world.
